Alison,

See query from International Business Times reporter. Since this isn't a local reporter, I'm sending your way. – Terri

Hi Mr. Matlock –

I'm curious – what sort of cleanup procedures might the WVDEP and the EPA employ in cleaning up this spill?

What's the standard operating procedure when it comes to a major chemical spill in a big waterway? Is there a way you can contain the spill? I imagine it must be more difficult than dealing with something like an oil spill that floats on top of the water.

Thanks!
